## PROJECTS

### SHOPPING CART (10/2022) [↗](#)

- Developed the backend of shopping Website with Rest APIs like POST,GET,PUT,DELETE , used AWS S3 for storing profile and product images and Bcrypt and JWT as security tools.
- This project based on commercial website like: Amazon, Flipkart, Myntra.
- Nodejs, JavaScript , Express, Mongodb, Postman.

### URL SHORTENER (10/2022) [↗](#)

- URL shortening is used to create shorter aliases for long URLs. We call these shortened aliases "short links." Users are redirected to the original URL when they hit these short links.
- Nodejs, JavaScript , Express, Mongodb , Postman , Redis & Caching

### BOOK MANAGEMENT (09/2022) [↗](#)

- Created a Backend where Author can register and then can upload their Books. Nodejs, JavaScript, Express, Mongodb, Mongoose
- Authenticated user can read those Books, and also add reviews to them.
- Nodejs, JavaScript, Express, Mongodb, Mongoose

### OPEN TO INTERNS (09/2022) [↗](#)

- A college intern website to provide admission for internship which involves management of intern and their college details.
- Nodejs, JavaScript, Express, Mongodb, Mongoose, Postman

### BLOGGING-SITE (09/2022) [↗](#)

- We have created backend for a blogging where any one can signup and create there blog, and user can read blogs Like : One Magazine
- Nodejs, JavaScript, Express, Mongodb, Postman, Jsonwebtoken
